TRUCK MOUNT SYSTEM

ISI nVISION TRUCK MOUNT SYSTEM

Now available is the nVision Truck Mount System. The sleek, low profile design allows for the storage and charging of the nVision thermal imager with the battery to insure the camera is always ready to go. A spare battery compartment with drop-in charging is also included. A compartment is built in the design as an additional battery storage area.

RUGGED, COMPACT DESIGN

- Rugged steel outer housing wrapped around the inner section made of toughened molded plastic
- 7.85" x 8.55" compact design
- Floor or wall mounted for a variety of configurations
- Powered by 12 volts DC from the apparatus or an optional AC adapter
- Spare battery storage compartment

SECURE CAMERA LATCHING SYSTEM

- Handy quick release cam action buckle and pad that also protects the viewing window of the imager

CHARGING CAPABILITIES

- Front charging station securely retains a spare rechargeable battery
- Allows dual charging of both the spare battery and camera mounted battery at the same time
- Simple charging indicators – Red LED in charging mode and green when battery is fully charged
